DETAILED ACTION

1. Applicant's election of the invention of claims 1-22 and 25-35 (Group I) in the Paper filed April 1, 2004 is acknowledged.

However, upon further consideration, a further restriction will be made for the above elected invention (i.e., claims 1-22 and 25-35) as set forth below:

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-19, drawn to a hand held washing unit, classified in class 15, subclass 28.
- II. Claims 1-9, 20-22 and 25-35, drawn to a motor and battery (pack) unit, classified in class 318, subclass 139.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a battery pack that is receivable in an upper cavity (claim 1), nor does the combination require a yoke attached to the motor drive unit (claim 20), nor does the combination

Art Unit: 1744

require a seal member positionable between the battery pack and the housing for sealing electrical contacts (claim 25). The subcombination has separate utility such as being utilized in a lawn cutter assembly or in a power saw device.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
